Projects

Hotel Reservation System

- Collaborated on the development as part of a Computer Programming 1 project, using Visual Basic .NET and MSSQL for database integration.
- Led the database design and supported the development of backend functionalities.

Cavite State University - Bacoor Campus Website

- Led the development of the website and handled all frontend tasks for a Web Systems and Technologies project.
- Utilized CSS, HTML, and JavaScript to optimize the website for user experience.

Alumni Tracking System

- Developed the frontend and backend using HTML, CSS, JavaScript, PHP, and MySQL for the Web Systems and Technologies project.
- Implemented full CRUD functionalities to manage and update alumni records efficiently.

Quintech IT Company

- Managed the content, decided what to include, and reviewed the website for any errors as part of the project for Web Systems and Technologies.
- Bootstrap was used for the design and layout to ensure a responsive and visually appealing interface.

Orderizz

- Contributed to backend development for Orderizz, an order management system, using Java and MySQL as a project in OOP, Information Systems, and Database Management.
- Managed and maintained the database for efficient system performance.

Department of Computer Studies Enrollment System

- Contributed to the development of the system using React.js and Node.js for the Software Engineering 2 project.
- Managed the database and performed QA to ensure system quality and efficiency.
